Dev Environments BETAExtensions BETA

Add Extensions

Containers [Give Feedback](#)

A container packages up code and its dependencies so the application runs quickly and reliably from one computing environment to another. [Learn more](#)

Run a Sample Container

Try running a container: Copy and paste this command into your terminal and then come back

```
docker run -d -p 80:80 docker/getting-started
```

[Explore more in the Docker Docs](#)

Guides

Redis

An open-source in-memory key-value store that functions as a data structure server.

Run

NGINX

An open-source web server, reverse proxy, load balancer and HTTP cache.

Run

PostgreSQL

An open-source object-relational transactional ACID-compliant SQL database.

Run

RAM 1.29GB

CPU 0.23%

Not connected to Hub

v4.12.0

Welcome, Karthikeya!

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

Create a Single Sender

[Authenticate a domain instead](#)

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more](#) about this.

Send your first email

Please create a sender identity before sending your first email.
